WASHINGTON, DC, *5 January 1976*

Direct Support and General Support Maintenance Repair Parts and Special Tools List (Including Depot Maintenance Repair Parts and Special Tools)

LANDING CRAFT, MECHANIZED, STEEL; DED; OVERALL LENGTH 74 FEET; MOD I MARK VIII, NAVY DESIGN LCM-8 (GUNDERSON BROS. ENGINEERING CORP, MARINETTE MARINE CORP AND ROHR CORP) NSN 1905-00-935-6057

Current as of 9 September 1975

TM 55-1905-217-34P, 8 June 1973, is changed as follows:

The title is changed as shown above.

NOTE

All "Federal Stock Numbers" appearing in this publication should be corrected to the new "National Stock Numbers" before using. This can be done by inserting -00- after the Federal Stock Class. For example, Federal Stock Number 6115-937-0929 will be corrected to the following National Stock Number: 6115-00-937-0929. Wherever the words "Federal Stock Number" appear throughout the publication, correct to read "National Stock Number."

Page viii. Paragraph 7 is superseded as follows:

7. Reporting of Errors

You can improve this manual by recommending improvements using DA Form 2028 (Recommended Changes to Publications and Blank Forms) and/or DA Form 2028-2 (TEST) located in the back of the manual and mail the form direct to Commander, US Army Troop Support Command, ATTN: AMSTS-MPP, 4300 Goodfellow Blvd., St. Louis, MO 63120. A reply will be furnished direct to you.

Page 40. Following line item 20, add the following:

PAOZZ — NSN 2815-00-938-5760 —	Cooler, Fuel Oil P/N 5136348, M/C (72582)	C — EA — 4 — 22 — 37

Page 45. Delete line items 4, 5, 6, 7, and 20 in their entirety.

Following line item 3, add the following:

PBOZZ —	— Muffler Assembly: w/baffle, cres 3/16 in., P/N 205-4510947-55, M/C (75301)	C — EA — 4 — 25 — 8

Following line item 19, add the following:

PBOZZ —	— Muffler Assembly: w/baffle, cres 3/16 in., P/N 205-4510947-55, M/C (75301)	C — EA — 4 — 25 — 18

Page 74, line item 9, column 1. Change "PAOZZ" to read "PAOHH".

Column 2. Change "2815-587-3400" to read "NSN 2815-00-587-3400".

Page 76, line item 11, column 1. Change "PAOHH" to read "PAOZZ".

Column 2. Change "4320-689-3037" to read "NSN 4320-00-689-3037".

Page 79, line item 2, column 2. Change "2990-895-3407" to read "NSN 2520-00-406-3260".

Page 229, line item 13, column 2. Change "2010-127-4796" to read "NSN 2010-00-127-4796".

Column 3. For Shaft, Propeller, following P/N MMC42M3 (98042), add "with monel sleeve".

Under Usable on code, add "AB".

Following line item 13, add the following:

PAOHH —	— Shaft, Propeller, Bronze, P/N 245-4510951-M-3 (80064) with monel sleeve	C — EA — 2 — 150 — 13

Page 298, figure 22. Add item number 37 with arrow pointing to piping between item numbers 29 and 30.

Section III. SPECIAL TOOLS LIST (Not applicable)

IV. FEDERAL STOCK NUMBER AND REFERENCE NUMBER INDEX 455

Section I.
INTRODUCTION

1. Scope.

a. This manual lists repair parts, special tools, test and support equipment required for the performance of direct support, general support, and depot maintenance of the landing craft.

b. Repair parts listed represent those authorized for use at indicated maintenance levels and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 710-2.

2. General.

This repair parts and special tools list is divided into the following sections:

a. Repair Parts List - Section II. A list of repair parts authorized at the direct support, general support, and depot levels for the performance of maintenance. The list also includes parts which must be removed for the replacement of the authorized parts. Parts lists are composed of assembly groups in ascending numerical sequence, with parts in each group listed in figure and item number sequence.

b. Special Tools, Test and Support Equipment - Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the direct support, general support, and depot level. (Not applicable).

c. Federal Stock Number and Reference Number Index - Section IV. A list, in ascending numerical sequence, of all Federal stock numbers appearing in the listings, followed by a list, in alpha-numeric sequence, of all reference numbers appearing in the listings. Federal stock number and reference numbers are cross-referenced to each illustration figure and/or item number appearance.

3. Explanation of Columns.

The following provides an explanation of columns found in the tabulated listings in Section III.

a. Source, Maintenance, and Recoverability Codes (SMR). The SMR code is a five letter code composed of three parts consisting of a two (2) position source code, a two (2) position maintenance code, and a one (1) position recoverability code. Support items listed in this RPSTL assigned maintenance and recoverability codes and no source code can be requisitioned, with justification, through a normal supply channels by use of the manufacturers code and part number. Such support items are NOT normally stocked.

(1) *Source Code.* Indicates the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the *first* and *second* positions as follows:

Code	*Definition*
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purposes because essentiality dictates that a minimum quantity be available in the supply system.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriora- in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issue or outfittings. NOT subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfittings to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for life of the equipment. It is applied to an item peculiar to the equipment which, because of probably discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later date.
KD	An item of depot overhaul/repair kit and not purchased separately.
KF	An item of a maintenance kit and not purchased separately.
KB	Item included in both a depot overhaul/repair kit and a maintenance kit.
MO	Item to be manufactured or fabricated at organizational level.
MF	Item to be manufactured or fabricated at direct support maintenance level.
MH	Item to be manufactured or fabricated at general maintenance support level.
MD	Item to be manufactured or fabricated at depot maintenance level.
AO	Item to be assembled at organizational level.

Code	Definition
AF	Item to be assembled at direct support maintenance level.
AH	Item to be assembled at general support maintenance level.
AD	Item to be assembled at depot maintenance level.
XA	Item is NOT procured or stocked because the requirements for the item will result in replacement of the next higher assembly.
XB	Item NOT procured or stocked. If not available through salvage, requisition.
XC	Installation drawing, diagram, instruction sheet, or field service drawing that is identified by manufacturer's part number.
XD	A low mortality item that is not stocked. When required, items will be requested and provided through normal supply channels.

NOTE

Cannibalization or salvage may be used as a source of supply for any items coded above *except* those coded XA and support items restricted by AR 700-42.

(2) *Maintenance Codes.* The maintenance code entered in the *third* position indicates the lowest maintenance level authorized to remove, replace, and use the item. The maintenance code entered in the *fourth* position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). When a maintenance code is not used in the *fourth* position, a dash (-) will be entered.

Code	Application/Explanation
O	Item is removed, replaced, used (third position), or complete repair (fourth position) at the organizational level.
F	Item is removed, replaced, used (third position), or complete repair (fourth position) at the direct support maintenance level.
H	Item is removed, replaced, used (third position) or complete repair (fourth position) at the general support maintenance level.
D	Item is removed, replaced, used (third position) or complete repair (fourth position) at the depot maintenance level.
L	Repair restricted to designated specialized repair activity (fourth position).
Z	Non-repairable. No repairs authorized (fourth position).
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the *user* level. No parts or special tools are procured for maintenance of this item (fourth position).

(3) *Recoverability Code.* The recoverability code entered in the *fifth* position indicates the disposition action on unserviceable items.

Code	Definition
Z	Non-repairable item. When unserviceable, condemn and dispose at the level indicated in position three (3).
C	Repairable item. When uneconomically repairable, condemn and dispose at organizational level.
F	Repairable item. When uneconomically repairable, condemn and dispose at direct support level.
H	Repairable item. When uneconomically repairable, condemn and dispose at general support level.
D	Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
L	Repairable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
A	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material, or hazardous material).

b. Federal Stock Number. Indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

c. Description. Indicates the Federal item name and a minimum description required to identify the item. The last line indicates the reference number followed by the applicable Federal Supply Code for Manufacturer (FSCM) in parenthesis. The FSCM is used as an element in item identification to designate manufacturer or distributor or Government agency, etc., and is identified in SB 708-42. Items that are included in kits and sets are listed below the name of the kit or set with quantity of each item in the kit or set indicated in front of the item name.

d. Unit of Measure (U/M). Indicates the standard or basic quantity by which the listed item is used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation, e.g., ea, in, pr, etc., and is the basis used to indicate quantities and allowances in subsequent columns.

e. Quantity Furnished with Equipment (Basic Issue Items Only). Indicates the quantity of the item furnished with the equipment.

f. 30-Day DS/GS Maintenance Allowances.

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The allowance columns are divided into three subcolumns. The quantitative

allowance of special tools for DS/GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipments supported. (Not applicable).

g. 1-Year Allowance Per 100 Equipments/Contingency Planning Purposes.

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) This column indicates the total quantity of special tools required for distribution and contingency planning purposes. (Not applicable).

h. Depot Maintenance Allowance per 100 Equipments.

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) This column indicates the total quantity of special tools authorized for depot maintenance of 100 equipments. (Not applicable).

i. Illustration. This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item in the illustration.

4. Special Information.

a. Usable on codes are included in Column 3. *Uncoded items are applicable to all models and/or serial number range.* Identifications of the usable on codes used in this publication are:

Code	Used On
A	Marinette Marine Corp LCM 8500 thru 8519
B	Gunderson Bros Engineering Corp LCM 8520 thru 8539
C	Rohr Corp LCM 8540 thru 8560 and 8580 thru 8619

b. The basis of issue for authorized special tools, test, and support equipment is the number of end items of equipment supported and the number of maintenance personnel allocated to perform the required maintenance operations.

c. Parts which require manufacture or assembly at a level higher than that authorized for installation will indicate in the source column the higher level.

d. Repair parts kits and gasket sets appear as the last entries in the repair parts listing for the group or assembly to which they apply.

e. Action change codes indicated in the left-hand margin of the listing page denote the following:

N - Indicates an added item.
C - Indicates a change in data.
R - Indicates a change in FSN only.

f. The following publications pertain to the landing craft and its components:

TM 55-1905-217-12	Operator and Organizational Maintenance Manual
TM 55-1905-217-20P	Organizational Maintenance Repair Parts and Special Tools Lists
TM 55-1905-217-34	Direct Support and General Support Maintenance Manual

5. How to Locate Repair Parts.

a. When Federal stock number or reference number is unknown:

(1) Using the table of contents determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) Find the illustration covering the assembly group to which the repair part belongs.

(3) Identify the repair part on the illustration and note the illustration figure number and item number of the repair part.

(4) Using the repair parts listing, find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When the Federal stock number or reference number is known:

(1) Using the Index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number and reference number. This index is in ascending FSN sequence followed by a list of reference numbers in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

(2) Using the Repair Parts Listing, find

the assembly group of the repair part and the illustration figure number and item number referenced in the Index of Federal Stock Numbers and Reference Numbers.

6. Abbreviations.

amp ..... ampere(s)
cont ..... continuous
deg ..... degree(s)
ea ..... each
ft ..... foot (feet)
hex ..... hexagon
id ..... inside diameter
in ..... inch(es)
lb ..... pound
lg ..... length (long)
lh ..... left hand
mtg ..... mounting(s)
no ..... number
od ..... outside diameter
rh ..... right hand
sh ..... sheet
sq ..... square
thd ..... thread(s) (ed)
v ..... volt(s)
yd ..... yard(s)

7. Recommendations for Maintenance Publications Improvements.

You can improve this manual by calling attention to errors and by recommending improvements, using DA Form 2028 (Recommended Changes to Publications) or by a letter, and mailing direct to Commander, U. S. Army Troop Support Command, ATTN: AMSTS-MPP, St. Louis, Missouri 63120. A reply will be furnished directly to you.
